

# ZAMA BUILT THE ENGINE. WE BUILD THE LAUNCHPAD.

Sealed Launch: the first launchpad bots can't snipe.

# WHY THE BANK SHOULD BET **ON THE DEGENS.**

---

01 Crypto doesn't adopt technology. It adopts crowds.

02 Institutions follow volume. They don't create it.

---

03 **Launchpads are where the crowd comes in.**

---

# EVERY ECOSYSTEM'S BREAKOUT **HAD A LAUNCHPAD.**

| ECOSYSTEM       | LAUNCHPAD MOMENT           | WHAT MOVED                                   |
|-----------------|----------------------------|----------------------------------------------|
| SOLANA          | TRUMP, Jan 2025            | All-time record chain revenue in one day     |
| BNB CHAIN       | four.meme, Oct 2025        | Monthly users from 36M to 58M                |
| BASE            | Zora and Clanker, Jul 2025 | Daily launches from 6.6K to 50K              |
| ROBINHOOD CHAIN | PONS, Sep 2026             | 10K+ launches a day, two months after launch |

Solana had Pump.fun. BNB had four.meme. Base had Zora and Clanker. **Confidential crypto doesn't have its launchpad yet.**

**INSTITUTIONS BRING  
TRUST.  
CROWDS BRING  
ADOPTION.**

Zama has the first. We bring the second.

# THE RAILS ARE READY. THE CROWD ISN'T HERE YET.

# ON A PUBLIC CHAIN, EVERY LAUNCH IS RIGGED.

01

## BOT SEES THE BUY

Every pending trade is public.

02

## BOT FRONT-RUNS IT

It buys first, lower on the curve.

03

## BOT DUMPS ON YOU

Retail buys the top. The bot exits in profit.

**YOU CAN'T OUT-RULE  
THE BOTS.  
YOU OUT-ENCRYPT  
THEM.**

```
> encrypt(bid) in → encrypt(fill) out
```

**Fair for the crowd. Auditable for regulators.**

# SEALED LAUNCH.

01

## LAUNCH

Any creator launches a token in one click.

02

## SEAL

For one hour, everyone bids.  
Amounts are encrypted.  
Nobody sees anything.

03

## SETTLE

One fair price for all,  
computed in FHE.

04

## GRADUATE

Liquidity goes to a DEX,  
locked. Creator tokens  
vest. No rug in one click.

Zama sold its own token this way: **a sealed-bid auction in FHE, 11,103 bidders, January 2026.**

Sources: Zama auction docs, Chainwire (27 Jan 2026)

# ONE LAUNCHPAD. A FACTORY OF CROWDS.

**1**

LAUNCHPAD

Sealed Launch, built on  
Zama.

**1,000s**

CREATORS

Every launch deploys a  
confidential contract with  
Zama.

**100,000s**

USERS

Every bid is an FHE operation, paid  
in \$ZAMA.

# LAUNCHPAD FIRST. THEN THE FULL STACK.

## NOW

### SEALED LAUNCH

fair launches, built on Zama.

B2C

B2B

## NEXT

### CONFIDENTIAL AMM

graduated coins trade with hidden order sizes. Liquidity stays with Zama.

B2C

## LATER

### MOBILE APP

privacy by default, for the next generation of traders. Fair launches as a service for Zama's partners.

B2C

B2B

**\$ZFROG is the community's flag.** Its fees already buy \$ZAMA for its holders.

Zama is cross-chain: the launchpad follows the crowd to every chain Zama supports.

# WHAT A LAUNCHPAD DOES TO A PROTOCOL'S NUMBERS.

**4.4M**

Pump.fun transactions in one day. With Zama, each one is an FHE operation.

**199K**

Active addresses a day. Each one a wallet onboarded to confidential tokens.

**100%**

Of protocol fees burned. With Zama, every fee is paid in \$ZAMA.

**0**

**Brand risk.** A separate lab carries the degen side.

**Benchmarks, not promises.** Year-one targets set together with Zama.

Sources: DefiLlama pump.fun (4 Oct 2026), Zama Protocol Litepaper (fees)

# DEGEN CULTURE. **BANK- GRADE GUARDRAILS.**

## SEPARATE LAB

Independent entity and brand.  
Zama's name is never on a coin.

## AUDITABLE BY DESIGN

Zama's access controls give auditors  
and regulators the view they're  
entitled to.

## LAUNCH RULES

Locked liquidity and creator vesting  
by default. No rug in one click.

WHY US

# TWO FOUNDERS. ONE CROWD.

**1M+**

developers in the BeMyApp  
community

**500K+**

people brought to IRL events

**140K+**

cumulative online reach

**9**

flagship conferences on 3 continents

## JOHN KARP

### THE BUILDER OF CROWDS

Co-founded BeMyApp (2010): 3,500+ events, 200+ corporate clients incl. Google, Microsoft, Intel, Samsung. Founder of NFC Summit, Lisbon: 5 editions, ~20,000 attendees, partners OpenSea, Magic Eden, Tezos. Co-host of NFT Morning: 957 daily episodes. Founder of NFT Factory Paris, backed by Ledger, Sorare and The Sandbox.

## JULIEN "METAFROGGY" PAREDES

### THE MEMES AND THE ECOSYSTEMS

Co-founded MEMECON, the world's first memecoin conference: 4 editions in 13 months across Lisbon, Singapore and Bangkok. 2 years at the TON Foundation leading ecosystem and partner go-to-market. Now BD & Ecosystem Lead at Draper University, a network of 5,000+ founders in 100+ countries.

**WE DON'T BUY A CROWD. WE ALREADY HOST ONE.**

Lead FHE engineer: first hire, funded by the pilot.

Company-reported and cumulative figures. 9 conferences = NFC Summit ×5, MEMECON ×4.

# WHY NOW.

## FHE IS READY

Mainnet since Dec 2025,  
1,040 confidential TPS.

## THE MECHANISM IS PROVEN

Zama's own sealed-bid  
auction, 11,103 bidders.

## PRIVACY IS THE NARRATIVE

\$ZAMA doubled in a week  
on confidential DeFi news.

## FIRST MOVER

confidential crypto has no  
launchpad yet. The lane is  
empty.
